

Subiectul D. OPTICĂ

Nr. item	Soluție/Rezolvare
III.a.	$L_{extr} = h\nu_0$ $\nu_0 = \frac{c}{\lambda_0}$ <p>Rezultat final: $L_{extr} = 2,25\text{eV}$, $L_{extr} = 3,6 \cdot 10^{-19} \text{ J}$</p>
b.	$\varepsilon = h\nu$ $\nu = \frac{c}{\lambda}$ <p>Rezultat final: $\varepsilon = 2,75\text{eV}$, $\varepsilon = 4,4 \cdot 10^{-19} \text{ J}$</p>
c.	$h\nu = L_{extr} + E_c$ $E_c = \frac{m_e v^2}{2}$ <p>Rezultat final: $v \cong 4,2 \cdot 10^5 \text{ m/s}$</p>
d.	$\lambda' = \frac{\lambda}{n}$ <p>Rezultat final: $\lambda' \cong 0,34 \mu\text{m}$</p>
