Subjectul D. OPTICĂ

Nr. item	Soluţie/Rezolvare
III.a.	$v = \frac{c}{\lambda}$
	λ
	Rezultat final: $v = 5 \cdot 10^{14} Hz$
b.	$\frac{mv^2}{2} = hv - L$
	$v = \sqrt{\frac{2(h\upsilon - L)}{m}}$
	$v = \sqrt{\frac{m}{m}}$
	Rezultat final: $v \approx 2.5 \cdot 10^5 m/s$
C.	$L = hv_0$
	$\lambda_0 = \frac{c}{v_0}$
	Rezultat final: $\lambda_0 \cong 6.6 \cdot 10^{-7} m$
d.	$\frac{mv^2}{2} = eU_s$
	$\frac{mv^2}{2} = eU_s$ $U_s = \frac{mv^2}{2e}$
	Rezultat final: $U_s \cong 0.19V$
