Subjectul D. OPTICĂ

Nr. item	Soluţie/Rezolvare
III. a.	
	$v_0 = \frac{L_{\text{ext}}}{h}$
	Rezultat final: $v_0 \cong 4,58 \cdot 10^{14} Hz$
b.	
	$\lambda_0 = \frac{c}{v_0}$
	Rezultat final: $\lambda_0 \cong 0,655 \mu m$
C.	
	$U_s = \frac{E_c}{e}$
	Rezultat final: $U_s \cong 3,75V$
d.	
	$h\frac{c}{\lambda} = L_{\text{extr}} + \frac{m_{\text{e}}v^2}{2}$
	$h\frac{c}{\lambda} = L_{\text{extr}} + \frac{m_{\text{e}}v^2}{2}$ $v = \sqrt{\frac{2\left(h\frac{c}{\lambda} - L_{\text{extr}}\right)}{m_{\text{e}}}}$
	Rezultat final: $v = 11.5 \cdot 10^5 \ m/s$
