Subjectul A. MECANICĂ

| Nr. item | Soluţie/Rezolvare |
|----------|---|
| III.a. | |
| | $E_c = \frac{mv^2}{2}$ $v = \sqrt{2gh}$ |
| | $v = \sqrt{2gh}$ |
| | Rezultat final: $V = 15m/s$ |
| b. | $L_{F_f} = m \cdot g \cdot h - \frac{mv^2}{2}$ |
| | $-\mu \cdot m \cdot g \cdot \cos \alpha \cdot AB = m \cdot g \cdot AB \cdot \sin \alpha - \frac{mv^2}{2}$ |
| | Rezultat final: $AB = 15m$ |
| C. | $L_{F_f} = \Delta E_m$ |
| | $L_{F_f} = \Delta E_m$ $L_{F_f} = -m \cdot g \cdot h \cdot \cos \alpha \cdot AB$ |
| | Rezultat final: $L_{{\cal F}_f} = -30J$ |
| d. | |
| | $E_p = L_{F_f} + E_c$ |
| | Rezultat final: $E_p = 60J$ |
