## Subjectul D. OPTICĂ

Nr. item	Soluţie/Rezolvare
III. a.	
	$E_f = hv = hc/\lambda$
	Rezultat final $E_f = 3.3 \cdot 10^{-19} J$
b.	
	$hc/\lambda_0 = L_{ext}$
	Rezultat final $L_{\text{ext}} \cong 3.04 \cdot 10^{-19} J$
C.	
	$hc/\lambda = L_{\text{ext}} + m_{\text{e}}v^2/2$
	$hc/\lambda = L_{ext} + m_{e}v^{2} / 2$ $v = \sqrt{\frac{2hc(\lambda_{0} - \lambda)}{\lambda \cdot \lambda_{0} \cdot m_{e}}}$
	Rezultat final $v \cong 2.4 \cdot 10^5 \ m/s$
d.	
	$E_{c_e} = eU_S$
	$E_{c_e} = eU_S$ $U_S = h \cdot c(\lambda_0 - \lambda)/e \cdot \lambda \cdot \lambda_0$
	Rezultat final $U_S \cong 0.16V$
