Subjectul D. OPTICĂ

Nr. item	Soluţie/Rezolvare
III. a.	$h\frac{c}{\lambda_1} = L_{\text{ext}} + eU_1$
	$h\frac{c}{\lambda_2} = L_{ext} + eU_2$
	$U_1 = nU_2$
	$h\frac{c}{\lambda_{1}} = L_{ext} + eU_{1}$ $h\frac{c}{\lambda_{2}} = L_{ext} + eU_{2}$ $U_{1} = nU_{2}$ $L_{ext} = \frac{hc\left(\frac{n}{\lambda_{2}} - \frac{1}{\lambda_{1}}\right)}{n-1}$
	Rezultat final: $L_{ext} \cong 2.2 \cdot 10^{-19} J$
b.	
	$L_{\text{ext}} = h v_0$
	Rezultat final: $v_0 \cong 3.3 \cdot 10^{14} Hz$
C.	
	$\lambda_0 = \frac{hc}{L_{ext}}$
	Rezultat final: $\lambda_0 \cong 892nm$
d.	grafic corect
