Subjectul D.OPTICĂ

| Nr. item | Soluţie/Rezolvare |
|----------|--|
| III.a. | $L = hv_0$ |
| | $v_0 = \frac{L}{h}$ |
| | Rezultat final: $v_0 \approx 5.57 \cdot 10^{14} Hz$ |
| b. | $\varepsilon = h \nu$ |
| | $v = \frac{\mathcal{E}}{h}$ |
| | Rezultat final: $v = 6.6 \cdot 10^{14} Hz$ |
| C. | $h\nu = h\nu_0 + \frac{m_e v_{\text{max}}^2}{2}$ |
| | $v_{\text{max}} = \sqrt{\frac{2h(v - v_0)}{m_e}}$ |
| | Rezultat final: $v_{\text{max}} \cong 3.85 \cdot 10^5 \text{m/s}$ |
| d. | $\Delta Ec = L$, |
| | $Ec_{max} = eU_{s}$ |
| | $U_{s} = \frac{h(v - v_{0})}{e}$ |
| | Rezultat final: $U_s \cong 0,424V$ |
