## Subjectul D. OPTICĂ

Nr. item	Soluţie/Rezolvare
II.a.	
	$C = C_1 + C_2$
	$C = C_1 + C_2$ $f = \frac{1}{C}$
	$t = \frac{1}{C}$
	Rezultat final: $f = 0.25 m$
b.	
	1 1_1
	$\frac{1}{x_2} - \frac{1}{x_1} = \frac{1}{f}$
	$x_1 f$
	$x_2 = \frac{x_1 f}{x_1 + f}$
	Rezultat final: $x_2 = -0.375 m$
C.	
	$\beta = \frac{x_2}{x_1}, \frac{1}{x_2} - \frac{1}{x_1} = \frac{1}{f}$ $x_1 = \frac{1 - \beta}{\beta} f$
	$x_1 = \frac{1 - \beta}{\beta} f$
	Rezultat final: $d = 0.5 m$
d.	
	$\beta = \frac{x_2'}{x_1'}, \frac{1}{x_2'} - \frac{1}{x_1'} = \frac{1}{f}$ $\beta = \frac{f}{x_1' + f}$
	$\beta = \frac{f}{x_1' + f}$
	Rezultat final: $\beta = -1$
