Subiectul B. ELEMENTE DE TERMODINAMICĂ

11.0	
II.a.	
	$\mu_1 = \mu_C + 2\mu_O$
	$\mu_1 = \mu_C + 2\mu_O$ $v_1 = \frac{m}{\mu_1}$
	Rezultat final: $v_1 = 1$ mol
b.	
	$N_1 = \frac{m_1}{\mu_1} N_A$
	Rezultat final: $N_1 = 6,023 \cdot 10^{23}$ molecule
C.	
	$m_0 = \frac{\mu_2}{N_A}$
	Rezultat final: $m_0 = 3.3 \cdot 10^{-27} \text{kg}$
d.	
	$\mu = \frac{m_1 + m_2}{\frac{m_1}{\mu_1} + \frac{m_2}{\mu_2}}$
	Rezultat final: $\mu = 12.5 \text{ kg/kmol}$
