## Subiectul **D. OPTICĂ**

Nr. item	Soluţie/Rezolvare
III.a.	
	$\varepsilon = h \cdot v$
	Rezultat final: $\varepsilon \cong 3,96 \cdot 10^{-19} J$
b.	$E_c = \frac{m_e \cdot v^2}{2}$ $E_c \cong 1,14 \cdot 10^{-19} J$
	$E_c \cong 1,14 \cdot 10^{-19} J$
C.	$hv = L + E_c$
	Rezultat final: $L \cong 2,82J$
d.	
	hv = L + eU
	$h = e^{\frac{U_{s1} - U_{s2}}{v_1 - v_2}},$
