Subiectul B. ELEMENTE DE TERMODINAMICĂ

II.a.	
	$m_0 = \mu / N_A$
	Rezultat final: $m_0 \cong 4,65 \cdot 10^{-26} \text{ kg}$
b.	
	$\rho = m/V$
	$m = \mu \cdot v$
	Rezultat final: $\rho \cong 5,6 \text{kg/m}^3$
C.	
	$p_1V = vRT_1$ $p_2V = vRT$
	$p_2V = \nu RT$
	Rezultat final: $T_2 = 600 \mathrm{K}$
d.	
	$pV = \frac{N}{N_A}RT$
	$\rho V = \frac{N}{N_A} RT$ $\rho V = \frac{N - \Delta N}{N_A} R \cdot 2T$
	$\Delta N = 0.5N$
	$\Delta N = \frac{\nu N_A}{2}$
	Rezultat final: $\Delta N = 6,02 \cdot 10^{23}$
