Subjectul D. OPTICA

Nr. item	Soluţie/Rezolvare
III.a.	
	$hc / \lambda = L_e + eU_S$ $L_e = hc / \lambda - eU_S$
	Rezultat final: $L_{ex} = 3.8 \cdot 10^{-19} J$
b.	
	$W = N \cdot h v$
	$N = W\lambda/hc$
	Rezultat final: $N \cong 3.8 \cdot 10^{20}$ fotoni / s
c.	
	$v_0 = \frac{L}{h}$
	rezultat final: $v_0 = 5.75 \cdot 10^{14} Hz$
d.	$hc/\lambda = L_e + E_{c1}$
	$hc/\lambda = L_e + E_{c1}$ $v = \frac{c}{\lambda}$
	$h(c/\lambda + \Delta v) = L_{e} + E_{c2}$
	$h(c/\lambda + \Delta v) = L_e + E_{c2}$ $f = \frac{\Delta E_c}{E_{c1}} = \frac{h\Delta v}{hc/\lambda - L_e}$
	Rezultat final: $f \cong 2\%$
